

On March 22, 2018, Bojan Vršnak gave a public lecture on the physical background of eruptive processes on the Sun. The lecture held at the public library "Bogdan Ogrizović" was organized by [Croatian Natural Society \(Hrvatsko prirodoslovno društvo, HPD\)](#) . In the lecture entitled "[Solar Eruptive Activity](#)

" (Sunčeva eruptivna aktivnost), he presented basic mechanisms that cause various forms of solar eruptions, their space-weather consequences and effects in geospace. Pictures from lecture are available [here](#)
