

Scientific sessions

- The Solar Photosphere - Theory and Observations
- The Chromosphere - Link between the Photosphere and Corona
- Eruptive Processes, CME's and Energetic Particles
- Solar-terrestrial Connection and the Heliosphere
- Observing Techniques, Data Analysis and Archives

Preliminary programme

Sunday, September 2, 2012

18:00 Registration

Monday, September 3, 2012

8:00 Registration

8:30 Opening

The solar photosphere – theory and observations I chairperson: E.W. Cliver

9:00 Burghard: Regularities in the distribution of solar magnetic fields (

9:30 Utz, J. Jurcak, L. Bellot-Rubiol, S. Thonhofer, A. Hanslmeier, A. Veronig, R. Muller, B. Lemmerer

9:50 Balch et al.: Properties of a decaying sunspot

10:10 Svanda, M. Svanda, J. Jurcak, D. Del Moro: Atmosphere above a light bridge

10:30 Nielsen: Complexes of active regions as basic source SPE with large and extreme particle fl

11:00 Coffee break

The solar photosphere – theory and observations II chairperson: M. Sobotka

11:30 Korsós, T. Baranyi, A. Ludmany: Study of sunspot group morphological variations leading to fla

11:50 Lemmerer, D. Utz, A. Hanslmeier, H. Grimm-Stehle, A. Veronig, S. Thonhofer, H. Muthsam

16:00 COMESEP* activities

The solar photosphere – theory and observations III chairperson: A. Ludmany

17:00 W. C. van den Scaalgaard: Reconciling International and Group sunspot numbers (

17:30 Gerasimova, Y. Nagovitsyn, B. Kirov: Long-term variations in sunspot magnetic fields

17:50 Svanda: An average supergranule: much larger vertical flows than expected

18:10 Gyenge, T. Baranyi, A. Ludmany: Variations of non-axisymmetric activity

19:00 HEFPOBS** activities

20:00 Welcome reception

Tuesday, September 4, 2012

The chromosphere – link between the photosphere and corona I □ □ □ chairperson: B. Vršnak

- 9:00 Ben120, P. Heinzel, E.H. Avrett, M. Herlender: Modelling of Ellerman bombs based on spectroscopic
9:20 Kot140 M. Barta, J.A. Kupryakov: On a signature of a flux-rope formation by spinning motions in
9:40 N. Sa000 and P.A. Bessalov: Large-scale perturbations near the solar atmosphere transition re
10:00 Dud120 G. Aulanier, B. Schmieder, M. Zapior, P. Heinzel: Magnetic structure and topology of quiet
10:20 Kot140 Suetterlin, P. Gasmasy, J. Rybak, A. Kučera: Search for Alfvén waves and shocks in
10:40 Zapi100 P. Rudawy: Estimation of magnetic field in solar prominences based on spatial motions
11:00 Coffee break

The chromosphere – link between the photosphere and corona II □ □ □ □ □ □ chairperson: A. Kučera

- 11:30 Sch150, P. Heinzel, P. Kotrč, Yu. A. Kupryakov: The total mass of several prominences estimated
11:50 Zapi100 Zapior, P. Kotrč: Simultaneous observations of solar prominence oscillations using two tele
12:10 Bal130 eslicka, S. Gibson, Y. Fan, C. Bethge, L. Rachmeler, B. Forland: Twisted bunny heads e
12:30 Wle150 G. Stellmacher, R. Ramelli, M. Bianda: The hot skin of solar prominences
12:50 13:10 Curdt, H. Tian: Explosive Events - Swirling Chromospheric Jets

16:00 HEFPOBS activities

Observing techniques, data analysis and archives I □ □ □ □ □ □ □ □ □ □ chairperson: P. Kotrč

- 17:00 Ben120 A. Benz, M. Shimojo, M. Karlicky, L. Testi, R. Mauersberger, A. Hales, M. Temmer: Solar
17:20 E-Da140 masch, M. Dominique, M. Kretschmar: Two years of solar observations with PROBA2/L
17:40 Hein120, S. Gunar, A. Berlicky, N. Labrosse, S. Jeřič : Use of a new generation of space-born c
18:00 N. Zapi100, F. Auchere, S. Parenti, and the SIGMA consortium: SIGMA: a new space mission to
18:20 Gyl140 A robust model for determining the solar limb

Wednesday, September 5, 2012

Eruptive processes, CMEs and energetic particles I □ □ □ □ chairperson: M. Karlicky

- 9:00 Ya, Zlot100, V. Zaitsev, A.T. Altynev: Polarization of zebra pattern in solar radio emission (
9:30 Kar100, M. Barta, K. Jirička: Fragmented reconnection and narrowband decimetric spikes (
10:00 S. So120 h, L.K. Kashapova: Using parametric diagrams constructed from microwave data for stu
10:20 A. Zha100 nov, L.K. Kashapova, V.G. Zandanov: Quasi-periodic radio pulsations in the solar flare c
10:40 Mite100 K.-L. Klein, S. Samwel, G. Trotter: Solar energetic particles and parent solar activity du
11:00 Coffee break

Eruptive processes, CMEs and energetic particles II □ □ □ □ chairperson: E. Ya. Zlotnik

- 11:30 M. B150 od, T.I. Kaltman, L. Yasnov: The properties of the microwave source located above the r
11:50 Z. T100 Mrozek, S. Kolomanski, A. Netzel: HXR sources during the failed eruptions of filaments: ob
12:10 Ang130 et. al.: Magnetic “reconnection” in the solar corona
12:30 Kol150 anski, T. Mrozek: Loop-top sources of flares-squeezing information from RHESSI and SD

Eruptive processes, CMEs and energetic particles III □ □ □ □ □ □ chairperson: A. Veronig

- 16:00 Sylwester, J. Sylwester, M. Siarkowski, T. Mrozek, K.J.H. Phillips: Physical characteristics of se
 16:20 Sylwester, B. Sylwester, A. Kepa: Review of RESIK X-ray spectra database
 16:40 Warmuth, G. Mann; The energy budget of solar flares derived from X-ray spectroscopy and ima
 17:00 V. Pavlovetsky, A.A. Kochanov: Closed magnetic flux at coronal holes boundaries
 17:20 Kashapova, M. Karlicky, J. Dudik: Electron distributions and the soft-x ray line intensities

18:00 Visit to the Observatory

Thursday, September 6, 2012

Eruptive processes, CMEs and energetic particles IV Chairperson: J. Sylwester

- 9:00 Varady, M. Karlicky, Z. Moravec, J. Kashapova: The thick target model and its modifications (
 9:30 Kashapova, G.V. Rudenko, S.K. Tokhchukova, V.M. Bogod, A.A. Muratov: On the possible m
 9:50 A. Veronig, P. Gomory, I. Kienreich, N. Muhr, B. Vršnak, M. Temmer, H.P. Warren: Plasma diag
 10:10 Livshits: Magnetic structure of Coronal Mass Ejections
 10:30 Rollet, M. Temmer, C. Moestl, A. Veronig, N. Lugaz. U. Moestl: Assessing a new method for der
 10:50
 11:00 M. Temmer, T. Rollet, C. Moestl, B. Vršnak, A. Veronig: Propagation of CMEs in IP space
 11:10 Coffee break

Eruptive processes, CMEs and energetic particles V chairperson: A. Warmuth

- 11:40 Marušić, C. Marque, M. Mierla, L. Rodgriguez, A. Zhukov: Tracking the CME-driven shock wa
 12:00 Safari: An automatic detection method for extreme ultraviolet mini CMEs
 12:20 Beldi, M. Temmer, A. Vourlidas, A. Veronig: CME kinematics and “true” mass evolutions
 12:40 Instanov, G., Egorov Ya.I.: Study of CME properties with using AIA/SDO and SWAP/PROBA2 c
 13:00 Vybornov, M. Livshits, L. Kashapova: The observational effects from large flares on the c

16:00 HEFOPS activities

Eruptive processes, CMEs and energetic particles VI chairperson: P. Heinzel

- 17:00 Tomczak: Two solar flares that became X-ray plasma ejections
 17:20 Chmielewska, M. Tomczak, M. Mrozek: Simultaneous Yohkoh/SXT and TRACE observatons o
 17:40 Moravec, J. Kasapova, M. Varady. M. Karlicky: Formation of hydrogen Balmer lines in a twisted
 18:00 Mersin, M. Temmer, A. Veronig: Observations and preliminary MHD simulations of the Kelvin –
 18:20 Gribodo, J. Raymond, A. Ciaravella, R. Suleiman, Y.-K. Ko: UVCS/SoHO catalog of CMEs fro
 18:40 Livshits, Vrsnak, T. Zic, I.W. Kienreich, N. Muhr, M. Temmer, A.M. Veronig: Formation and evo
 19:00 COMESTP activities

Friday, September 7, 2012

Solar – terrestrial connections and the heliosphere I chairperson: A. Hanslmeier

- 9:00 Nikolaeva, Yu. I. Yermolaev, I.G. Lodkina: The development of magnetic storms in dependen
 9:20 Nikolaeva, N.S. Nikolaeva, I.G. Lodkina, M.Y. Yermolaev: Solar and interplanetary drivers of
 9:40 Đurđević et al.: Forecasting of geomagnetic activity caused by Coronal Mass Ejections
 10:00 Nikolaeva, O.V. Kozyreva : Outer Earth’s radiation belt electrons and ULF-activity dynamics c
 10:20 Heber, N. Dresing, W. Droege, R. Gomez-Herrero, K. Herbst, Y. Kartavykh, A. Klassen, J. Labr
 10:40 Ogiro: Effects of hysteresis between maximum CME speed index and geomagnetic activity inc
 11:00 Coffee break

Solar- terrestrial connections and the heliosphere **II** **chairperson: A. Ozguc**

11:30-11:50 A. Veronig, M. Temmer, D. Odstrcil: Comparison of MHD simulations of the solar wind

11:50-12:10 C. Abrevaya, A. Hanslmeier, M. Leitzinger, P. Odert, A. Buccino, P. Mauas: UV radiation of

12:10-12:30 Galovic: Testing a link between cosmic rays, solar irradiance and cloudiness over short times

16:00-17:00 COMESEP activities

17:00-18:00 HERBOS activities

21:00 wine and cheese in a Dalmatian konoba

*CORonal Mass Ejections and Study of Energetic Particles is an EC FP7 project

** Environment for Human Exploration and RObotic Experimentation in Space is an EC FP7 project

List of Posters

- Abbas Abedini: Slow Mode Oscillations of Solar Coronal loops
- Pavel Ambroz: Horizontal velocities in solar filament channel
- Peter Gomory: Chromospheric evidences of a small-scale loop emergence
- Bernd Heber: Simultaneous Analysis of Recurrent Jovian Electron Increases and Galactic Cosmic Ray Decreases
- Boian Kirov: 200-year cycle in solar asymmetry
- Pavel Kotrc: On the flat-shape emission in the post-eruptive phase of the solar flare on 7th June 2012
- Ales Kucera: Coronal Multi-channel Polarimeter (CoMP-S) at Lomnicki Stit Observatory in Slovakia
- Salvatore Mancuso: Constraining the radius of the source surface in PFSS models through Faraday rotation observations
- Zdenek Moravec: Formation of hydrogen Balmer lines in a twisted flare loop
- Judit Murakozy: Study of the decay of sunspots and sunspot groups
- Oana Stere: Correlation between ICME parameters and the geomagnetic storms
- Elvira Suyunova: On High Precision Imaging Linear Polarimetry in Prominences
- Stefan Thonhofer: Creating 3-dimensional Models of the Photosphere using the SIR Code for the investigation of small-scale magnetic fields - First results and Outlook
- Lidia vanDriel-Gesztelyi: Observations and modeling of magnetic reconnection driven by CME expansion
- Lidia vanDriel-Gesztelyi: Plasma outflows from active regions: are they sources of the slow solar wind?
- Alina Vishneva: Research of time-dependent 3-D parameters of halo coronal mass ejections with various velocities
