On November 17, 2016 Dr. Bojan Vršnak participated in the Croatian scientific TV show ([HRT-3: "Third Element"](#)

) entitled "Solar System". In the show, he explained the formation and evolution of the Sun, effects of the solar wind and the solar eruptive processes on the Earth and other objects in the solar system. Various solar-activity effects on the robotic and crewed space missions, including the future missions to Mars, were discussed.
