

This year's Festival of Science will be held from **10 to 15 May 2021** in 18 Croatian cities with the topic "**Culture of Science**" - What is culture and do we build a culture of science?". The novelty of this year's Festival of Science is a rich online program and for the more details about the Festival you can visit

[webpage here](#)

(in croatian). The Hvar Observatory also participated in the Festival of Science program with a video workshop "

Space weather - how to predict the arrival of solar storms on Earth?

" created by

[Karmen Martinić](#)

and

[Mateja Dumbović](#)

, which you can access
