Central European Astrophysical Bulletin (CEAB), Volume 42, 2018

Note: All volume articles are linked as pdf files

1.) Regular article

A comparison of solar ALMA observations and model based predictions of the brightness temperature
R. Brajša, M. Kuhar, A. O. Benz et al.

2.) Proceedings of XVIth Hvar Astrophysical Colloquium / ISEST 2018 Workshop

Edited by: D. Ruždjak

Determination of SEP Anisotropies Based on Four-Sector Measurements
M. Brüdern, N. Dresing, B. Heber et al.

CME volume calculation from 3D GCS reconstruction
L. Holzknecht, M. Temmer, M. Dumbović et al.

CME volume calculation from 3D GCS reconstruction
L. Holzknecht, M. Temmer, M. Dumbović et al.

Data based correction of Helios E6 measurements - Proton contamination of relativistic electron measurements
M. Hörlöck, B. Heber, J. Marquardt, P. Kühl

Very rare bursts observed in the 0.8 - 2.0 GHz solar radio spectra
K. Jirička, M. Karlicky

Extreme solar energetic electron events observed by Ulysses COSPIN/KET
M. Köberle, B. Heber, A. Klassen et al.

Near-relativistic electron increases during the 4 Jan 2008, 13 Jan 2011, and 7 May 2011 CIR events
A. Kollhoff, S. Wraase, B. Heber et al.

Small-scale dynamcis in a coronal-hole related to microflaring events
K. Krikova, D. Utz, A. Veronig et al.

Formation Heights of HINODE SOT/BFI Filters
O. Kühner, D. Utz, R. Muller et al.

Numerical Simulations of Kelvin-Helmholtz Instabilities in a two-fluid regime
I. Piantschitsch, A. Hanslmeier, M. Roth, T.V. Zaqarashvili

3D reconstruction and interplanetary expansion of the 2010 April 3rd CME
M. Rodari, M. Dumbović, M. Temmer et al.

Successive Reconnection as a Cause of Quasi-Periodic Pulsations with Large Periods
Z. Szaforz, M. Tomczak

Long time trends of MBP characteristics
D. Utz, R. Muller, T. Van Doorsselaere et al.
