

List of Posters

N.A. Drake, A.S. Miroshnichenko, S. Danford, C.B. Pereira: BG Gem - a Poorly-Studied Binary with
T. Garrel, A.S. Miroshnichenko, S. Danford, S. Charbonnel, F. Houpert: Spectroscopy of the mysterious
Hernan E. Garrido Vertel: A third case of supergiant system with peculiar photometry and spectroscopy
Damian Jableka: Investigation of O-C changes of a large sample of eclipsing binary systems
Nicola La Palombara: The hot-blackbody spectral excess as a common property of low-luminosity X-ray
Jiri Liska: New photometric study of a possible three-body system AV CMi
Anita Nasser, V.H. Hoffmeister, R. Chini: Multiplicity of southern B(e) stars
D. Ruzdjak, E. Pollmann, et al.: Recent observations of zeta Tau.
Aleksey Sosnovski: 1RXJ0038: the new eclipsing CV in the period gap with enormous activity of the
Claus Tappert: Getting to know the cataclysmic variable beneath the nova eruption
Olivier Thizy: Be Star Spectra and ARASBeAm front-end
Olivier Thizy: Spectrographs for Small Telescopes
Christine K. Wilson et al.: A Spectroscopic and Photometric Analysis of Pulsations of the F supergiant
S. Zola, M. Zejda, M. Siwak and F. de Villiers: Rediscussion of SV Cen, an early type eclipsing binary
