

[NEOWISE comet \(C/2020 F3\)](#) is currently one of the most spectacular objects on the night sky. It was discovered on 27th March 2020 by NEOWISE space telescope and it reached its perihelion (closest point to the Sun, 0.29 AU) on 3rd July. Its closest approach to the Earth will be on 23rd July at a distance of 0.69 AU. [Ivica Skokic](#) from Hvar Observatory made a beautiful photo of a comet NEOWISE from small town Samobor near Zagreb on 10th July which we publish [here](#)
